Legal Operations Transformed
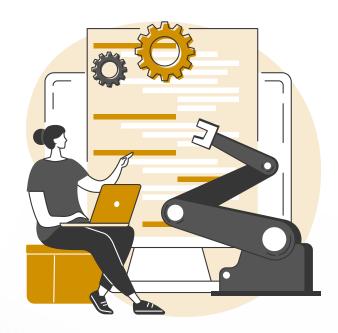

Empowering, supporting, and amplifying your legal team.

When Efficiency And Automation Is Your Goal

Lawcadia is an award-winning, end-to-end legal operations platform for high-performing in-house legal teams. A unique two-sided platform with an intelligent automation engine, Lawcadia transforms the way in-house legal teams and their law firms collaborate and solve business problems.

In-house legal teams benefit from structured intake and triage, streamlined workflows, accurate instructions, greater control of budgets and law firm engagements, as well as optimised document, email, and matter management. Plus, configurable metrics and dashboards clearly demonstrate the legal function's value within the organisation.

Do More With Less With No-Code Automation

The combination of matter management and no-code automation can help you focus on what you do best – provide excellent advice and service to your internal clients and adding value.

Automating processes enables you to work more efficiently, save time and reduce operational costs whilst keeping up with the increased pace and volume of business.

Purpose-built for in-house legal teams, Lawcadia is designed to help you and your team:

- ✓ Automate workflows between the business, in-house legal team and your law firms

- ✓ Gain visibility over matters, workloads, communications and projects

- ✓ Control and manage law firm engagements, scope of work, spend and invoicing

- ✓ Seamlessly collaborate within the legal team and with business stakeholders and law firms

- ✓ Demonstrate value to your organisation with accurate data and metrics that matter to you

- ✓ Enhance productivity with a platform that complements your processes and systems

Your Complete End-to-End Legal Operations Platform

Intake & Triage

Intelligent matter intake and triage provides intelligent, streamlined and automated workflows between your internal clients, in-house legal department, and even your external law firms.

Matter Management

Lawcadia's comprehensive matter management system organises and simplifies the oversight of all legal matters. You can monitor matter progress in real-time, ensuring no critical issue is overlooked.

Email & Document Management

With document and email management incorporated, you can save, store, and manage everything in one central and secure location, plus integrate with iManage.

No-Code Automation

Lawcadia's intelligent automation engine provides highly configurable no-code automation to streamline workflows and adapt the platform to meet your specific processes and ways of working.

Complex Approvals

Harness intelligent automation to enable approval workflows at decision points across the matter lifecycle, supporting multiple levels of approvers within the legal team and across the organisation.

Document Automation

Easy-to-implement document automation generates draft documents, agreements, and contracts, reducing manual data-entry. Plus, streamline legal review with automated approval workflows.

Spend Management

Get the most out of your legal spend with an innovative and structured approach to instructing, engaging, collaborating with, and managing outside counsel within one secure platform.

Invoicing & eBilling

You can opt for straightforward eBilling through PDF invoices or leverage the comprehensive capabilities of line-by-line invoice review and automated rate card compliance.

Reporting & Analytics

Transform your legal operations and be supported by metrics that help establish your legal function's value proposition with Lawcadia's automated reporting, analytics, and dashboards.

We Do Most Of The Work
So You Can Focus On What You Do Best

Onboarding

A dedicated Customer Success Manager will tailor a personalised onboarding schedule for your legal team and relevant stakeholders.

Project Management

Whether you're a small team or part of a large enterprise, we will project manage your implementation to ensure success.

Process Mapping

Adopting new technology becomes easy when existing processes are mapped to the Platform by our operations experts.

Training

Personalised training is provided for your team, law firms and key stakeholders so everyone is ready to go.

Sensational Support

When you need assistance or have a question our friendly and responsive team are here to help via email, phone and live chat.

Customised Reporting

As part of your implementation, we will set up customised dashboards and reports to meet your unique reporting needs.

You Want To Keep Your Data Safe. So Do We

Designed and built to comply with the most stringent global security standards, including the information security requirements of Government departments and Banks. Keeping your data safe with an ISO 27001:2022 certified Information Security Management System, regular third-party security reviews, audits and penetration testing, along with ongoing security updates.

SecurityScorecard has independently assessed and rated Lawcadia with an "A" grade and a score consistently higher than competitors.
