

**Lawcadia**<sup>®</sup>

Brisbane | London | Manila

**An intelligent legal  
operations platform  
for law firms wanting  
to demonstrate client  
innovation**

---

# We're helping you automate & innovate.

With 5,500+ law firm users and 6,000+ client users, Lawcadia's secure two-sided legal workflow and operations platform is built specifically for the industry.

## Easy to use

Our system's designed to be intuitive. With minimal training, you and your team - together with your clients - will be ready to go.

## Easy to configure

We understand that every client has different problems. From workflow automation to reporting, Lawcadia's platform is highly configurable, and we can partner with you to uncover solutions to solve your clients' pain points.

## Easy for your clients

Clients want to readily access communication, documents and advice that relate to their current and historic matters. Provide them with a secure, central repository and keep them updated with everything they need from advice, communications, documents, budgets, invoices and reporting – all in the one system.

“

Drawing on our firm's deep financial services capability we have been able to leverage Lawcadia's intelligent legal platform to solve client pain points in new ways and expand our client base. Our solution is the Gadens Breach Manager, and it is gratifying to see the up-take by clients already and how they are modifying the platform to extract even more value for themselves.

Paul Spiro, Chairman, Gadens

# Innovation that clients really want

**When innovation is the mandate, how can law firms deliver practical initiatives that make a valuable impact?**

With corporate and Government clients facing more pressure than ever before, providing just legal advice is no longer enough. Law firms must demonstrate innovation and embrace efficiency, digital transformation, transparent budget communication, information security and provide tailored client reporting.

The platform of choice for innovative legal departments, Lawcadia offers tailored solutions for law firms to help them enhance their client relationships, win more work, and improve efficiencies. The two-sided platform embeds the law firm directly within the client's workspace, securing mutually beneficial long-term relationships.

Lawcadia also provides all customer support requirements for your clients, freeing up internal IT resource, administrative and lawyer time.

## Transform your client relationships with intelligent solutions.

### High volume work

Streamline the flow of work from your clients with configurable instruction workflows that help to elevate and embed your key client relationships

### Showcase innovation in RFPs

Demonstrate your firms innovation capabilities by producing tailored and targeted workflow solutions to meet innovation requirements in client's RFPs or tenders

### Document automation

Easy-to-implement document automation generates draft documents, agreements and integrate with internal systems for complex contract delivery

### Regulatory & compliance workflows

Deploy easy-to-use workflow solutions for privacy, regulatory reporting, data subject access and freedom of information requests

### Innovative budget management

Empower your clients with predictable and transparent budget management by matter, phase or fee-earner, with data captured through the invoice process

### Get paid faster

Clients can quickly and easily approve invoices for payment with confidence. In addition, included is the ability to upload bulk invoices with minimum administrative work involved

### Collaboration workspace

Communicate and collaborate seamlessly with clients by sharing files, completed documents, status updates, messages, and even Gantt charts

### Customisable BI dashboards

Say good-bye to manual reports and spreadsheets and embrace Lawcadia's automated and customised BI reporting for clients

# Why Lawcadia.

These are some of the reasons clients and law firms choose Lawcadia's awarding winning platform:

## ✔ Greater efficiency

Intelligent automation, configurable workflows, and customisable reporting eliminates manual data entry, reduces administration and saves time

## ✔ Improve client service delivery

Client intake, collaboration tools and custom notifications provide transparency, plus a streamlined customer experience

## ✔ Budget management

Structured instructions, scope and budget management, internal client approval processes, and invoice data capture, provides predictability and clarity for your clients

## ✔ Sensational customer support

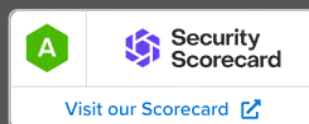

We are only as successful as our clients' implementation, and so we focus on tailored implementations, dedicated customer service, and on-going support

## ✔ Enterprise-grade security

ISO 27001 certification, private-cloud infrastructure, along with best-in-class security controls, sets us apart from the competition

## ✔ Accurate data & BI reporting

A single system that connects law firms with their clients to deliver accurate data, insightful reports, and custom dashboards
